 no adverse effects**  
**Used by 3 generations of dentists...**  
**No reason to change**

# PLASTOR

THE BEST PRODUCTS LAST OVER TIME

## CEMENT FOR TEMPORARY FILLINGS

**PLASTOR** is applied, without drying the tooth cavity. Is used as a temporary filling of cavities. Temporary filling over a medication (pulpitis' treatment - pulpar devitalization).

Temporary filling during endodontic treatments requiring more than one session.

**PLASTOR** hardens rapidly in contact with saliva, does not disintegrate, endures mastication. Furthermore it is easy to apply and remove, does not transmit heat thus preventing thermic stimuli on the pulp.

### PROPRIETIES: PLASTOR

is neutral and does not interfere with the usual medications. All its components are well tolerated by pulp and mucosae.

**PLASTOR** hermetically closes the cavity, perfectly adheres to the walls thus preventing infiltrations.

**PLASTOR** makes it possible to apply any type of medication without any emission.
